

April 2022

President's Report

The invite for the April meeting has already been sent out. Hopefully you noticed that we have a change of venue. For those of you who might not have heard, three days after our March meeting the Spaghetti Warehouse had a partial roof collapse. Because of that the board had to quickly find a new location for our April and May meetings. The April meeting will be at Raymond Memorial Golf Course. Unfortunately, that venue is not available in May so the May meeting will be at another location. Details for the May meeting will be sent out a week or two beforehand. We would like to hear feedback from our members about our April and May venues, as the Spaghetti Warehouse could possibly not be available in the Fall.

The Indianapolis chapter is preparing for the 2022 Convention and Expo (September 16-22). They are looking for volunteers to help with the logistics of the Convention (working check-in tables and such). If any of our members are interested in volunteering, please let me know and I will gather a list together. Columbus will be hosting the 2024 Convention and Expo, so helping the Indianapolis chapter this year should better prepare us for success in 2024.

The 2022 ASPE Golf Outing will be held on Tuesday June 21st at the Golf Club of Dublin. Sign up information should be coming out shortly so start gathering your foursomes.

There are several education and certification courses that ASPE is currently or soon planning on offering:

(Continued on page 6)

March In Person Lunch Meeting and Technical Presentation

April 11th, 2022

In Person

Raymond Golf Course

3860 Trabue Road

Columbus, OH 43228

11:30 PM—1:00 PM

\$20.00 — members; \$30.00 — non-members

**SUBJECT: Roof Drain Sizing and
Installation**

**SPEAKER: Scott Young,
Zurn**

Scott Young, an Applications & Design Engineer at Zurn Industries, has 8 years of experience in roof drainage system design, specification, and installation. He has currently been focusing on testing various roof drain designs/configurations and analyzing the results to be able to calculate/predict the effects of installed conditions.

HUSKY CR 7000 THE NEWEST MEMBER OF OUR PACK.

Husky HD 2000 | Husky SD 4000 | Husky CR 7000

316 Stainless Steel

First Heavy-duty coupling for corrosive applications

The first of its kind, the Husky CR 7000 is made with 316 stainless steel to perform better than any others in highly corrosive environments.

ChooseHusky.com

VP Technical—Bill Deardurff

Hello to all ASPE Members and friends,
Our next speaker will be Scott Young with Zurn
Roof Drainage. His presentations is to include:

1. History of testing gravity roof drains
2. Tested flow vs head depth drainage results
3. Effect of drain installation on flow performance
4. Installation best practices

In May the speaker is to be Josh Pedraja with
Patton's Medical equipment. We are also plan-
ning additional, more in depth sessions that af-
ternoon.

Please send me an email (address below). if
you have any ideas for design topics or new
products you would like to hear about next fall.

Bill Deardurff

MANUFACTURERS' REPRESENTATIVES OF THE HIGHEST QUALITY PLUMBING AND SPECIALTY BUILDING PRODUCTS

A Growing Family For A Growing World

Introducing the Ultra Force® LV

The State Ultra Force® family of commercial water heaters is now bigger and better with the addition of the new Ultra Force LV. Cutting-edge technology and a larger storage tank compared to other Ultra Force models allow the Ultra Force LV to meet most critical load requirements—and that's a big deal, literally.

FOR WHERE IT REALLY MATTERS

SyncroFlo is based in Norcross, GA with over 50 years of experience manufacturing packaged pumping systems and the first to prepackage pumping systems for boosting pressure in domestic water distribution systems. The "IronHeart," which has been the core of our business since 1985, has been the industry standard for pressure boosting domestic water in commercial buildings. We offer 32 standard models featuring close coupled end suction pumps configured in duplex and triplex models with flow rated to 750 GPM and boost pressures to 190 PSI.

WHY A SYNCROFLO PRE PACKAGED SYSTEM?

All SyncroFlo IronHeart systems are manufactured to the highest standards within the 155,000 square foot facility. SyncroFlo has a superior Quality Management System that is ISO 9001:2015 certified. All systems bear the UL & ETL labels and are certified to UL 778 and UL 508A standards. All our domestic water systems including the IronHeart line are NSF/ANSI 61, 372 & Annex G certified for drinking water applications. Control panels are assembled in a UL 508A panel shop with a QR (Quick Reference) code identification for web based access to the project documents. All systems are factory tested in a NIST traceable test stand and the results are recorded for generation of an XY plot.

QUALITY CONTROL AND TESTING!

SyncroFlo's quality control program is on the leading edge of technology for our industry. Each system is tracked at all stages of manufacturing, assembly, and testing with web based reporting via hand held devices. All welding is performed by AWS or ASME qualified welders. Once manufacturing and assembly are complete, the system is connected to our NIST calibrated test rig. We then hydrostatically test and flow test from zero to 100% of design and under specified suction and net delivery pressures. Once on site, your only surprise is how easy the system is to startup and commission.

ASPE Book of the Month

Through April 30, 2022, you can purchase the PDF version of *Domestic Water Heating Design Manual* for 35% off the regular member price. Just enter coupon code **SpringShowers** when you check out.

The fine print:

- Discount is only available for ASPE members.
- Discount can only be used on the PDF version of publications.
- If purchasing multiple items, the discount will be applied only to the assigned publication.
- The coupon code can only be used once.
- The coupon code cannot be used on top of the Chapter Officer discount.

Check [ASPE Pipeline](#), social media, and your inbox for news of upcoming Book of the Month discounts.

Upcoming Webinar – Firestopping Vertical & Horizontal Penetrations

April 21, 2022, 1:00 PM (EDT)

This course will outline the importance of proper firestopping design and recognizing the advantage of manufactured systems. Once the course is over the engineer will be able to recognize the importance of manufactured systems and update plumbing specifications to include manufactured, tested systems.

Content Outline:

- Firestopping defined
- Purpose of firestopping
- Importance of firestopping
- Ensure proper firestopping
- Manufactured vs. built-in-place systems
- Ideal firestopping methods
- Update specifications

- Summary

Learning Objectives:

Upon successful completion of the course learners will be able to:

- Understand what firestopping is
- Understand the importance of firestopping in design
- Recognize the advantages of manufactured systems vs. built-in-place systems
- Be able to identify correctly applied systems
- Be able to effectively update plumbing specifications

This webinar is free for ASPE members due to the generous sponsorship of Reliance Worldwide Corporation (RWC).

ASPE Read Learn Earn

Every month ASPE publishes a new 12-question quiz with an accompanying chapter or article from one of our publications. Each quiz is available for twelve months. Each quiz is free for ASPE Members and \$35 for nonmembers. Through this special series, ASPE can help you accumulate the CEUs required for maintaining your Certified in Plumbing Design (CPD) or Certified Plumbing Design Technician (CPDT) status or numerous regulatory-agency CE programs.

VP Legislative—Mike Spengler

New ASTM Water Standard to Help Detect Legionnaire's Disease Bacteria

ASTM International's water committee ([D19](#)) has approved a new standard that provides an easy and accurate culture method for detecting *Legionella pneumophila*, the primary bacteria responsible for Legionnaires' disease. It is a potentially lethal pneumonia contracted from the inhalation of *L. pneumophila* bacteria that has been aerosolized by contaminated water sources such as showers, pools and spas, or cooling towers.

The new standard (D8429) describes a method for detecting and quantifying *L. pneumophila* to meet water management requirements. Such requirements are necessary to regularly validate that treatment and control measures are effective in potable and nonpotable water associated with industrial, commercial, healthcare, and residential settings. Jody says the new method is easier to perform and provides faster results than other methods.

New Ohio Commerce and Board of Building Standards Website Launched

The Department of Commerce is launching a brand-new website this Friday, January 14 (<https://com.ohio.gov/wps/portal/gov/com/>). You will find featured resources that matter to your business/department and content that is incredibly helpful to consumers. Certain URL's you have bookmarked may change and overall, you will find a brand-new experience as a user.

As always, we value the work we do with our partners and stakeholders, and we look forward to the launch of this enhanced online platform. If you have any questions or concerns once the site launches, please contact the Department at inquiries@com.state.oh.us or the Board directly at BBS@com.state.oh.us.

Two New ICC Building Code Tools Available Online

The International Code Council has launched two online building code tools for building safety professionals and the public to access free information about building code usage in their communities.

Created in partnership with the Federal Alliance for Safe Homes (FLASH) and the Insurance Services Office (ISO), the [U.S. Code Adoption Database](https://codeadoptions.iccsafe.org/) (<https://codeadoptions.iccsafe.org/>) is an interactive map that shares code adoption information at the state and local level. A one-of-a-kind U.S. code adoption tool, the database displays which codes are adopted within each state/jurisdiction and provides context and links to access further code information.

The database also contains a color-coded map for each of the 15 International Codes (I-Codes)—the most widely used model building codes in the world—showing statewide code adoptions around the U.S. The most current adoption information is maintained across the site through a collaboration effort between the Code Council, FLASH, and ISO.

The [Global Building Codes Tool](https://www.iccsafe.org/products-and-services/global-services/global-codes/) (<https://www.iccsafe.org/products-and-services/global-services/global-codes/>) provides information about the building codes and standards used in countries around the world. Users may select a country from the world map to view information about the respective building safety regulation agencies, and the building codes and standards referenced and enforced within that country. The tool is designed to help manufacturers and designers who are interested in exporting their products and services to markets outside the United States, as well as to government officials around the world who are monitoring these regulations which impact market entry.

VP Membership—Tim Firlik

Greetings Fellow Chapter Members!

It looks as though we are trending to warm and sunny days, I am looking forward to more and more sunshine and the upcoming Golf Outing! We continue to add new members to our chapter, if you have someone that is considering joining, send them my way and I will personally help them out with the process.

Please join me in welcoming Jon Smart as our newest member.

I will be happy to contact anyone you send my way with a personal invitation to join our chapter. Feel free to call or email me with their information and I will take it from there.

Membership renewal! If you are up to renew your membership, remember to do it today! We don't want to see you go!

Please remember if any of your pertinent information has changed that it is your responsibility to notify ASPE National and The Central Ohio Chapter. You'll want to do this in order to remain on our mailing list.
