

August 2022

President's Report

I hope everyone had a great summer and is ready to get back to our regular meetings. The September 12th meeting invite has already been sent out and RSVP's have to be in by Friday September 2nd. For the 2022-2023 year we will be holding our meetings at the Reception House at Raymond Memorial. This is the location where we had our April meeting.

A reminder that the 2022 ASPE Convention and Expo is September 16th through 21st in Indianapolis. This is a premier opportunity for plumbing engineers and designers at all career levels to engage in productive technical exchanges and networking. The Convention and Expo kicks off with business meetings on the 16th thru 18th. The Exposition and Technical Education Sessions begin on Monday the 19th and thru Wednesday the 21st (Exposition is Monday and Tuesday only).

Attendees can choose from a variety of professional development sessions in several tracks to customize their learning experience. Classes are designed to teach participants how to integrate the most current design techniques into their projects, with hands-on calculation and application examples.

Registration is now open. More information can be found at the ASPE website (aspe.org). If you didn't know, registration for the Expo is free so even if you don't want to attend the convention you can still walk the Expo floor and it's on-

ly a short drive away.

I hope to see everyone September 12th.

Mike Nickoson

President

May In Person Lunch Meeting and Technical Presentation

September 12th, 2022

In Person

Raymond Memorial

3869 Trabue Road

Columbus, OH 43228

11:30 PM—1:00 PM

\$25.00 — members; \$35.00 — non-members

SUBJECT: Curbless Shower Design

SPEAKER: Darryl Jones

QuickDrain USA

Darryl is the National Manager of Commercial / Showroom Training for QuickDrain USA. Before joining QuickDrain USA, Darryl Jones was the Corporate Trainer for KWC's Aquapunkt, a state-of-the-art training facility located in Norcross, GA. He carries over 28 years of industry experience in showroom management, independent manufactures representation and continues to serve on the Education board for DPHA.

PLUMBING SYSTEMS: COMMERCIAL IRONHEART PR

CONTACT INDUSTRIAL SALES CO.

FIELD START-UP, TRAINING AND
SUPPORT.

FOR WHERE IT REALLY MATTERS

SyncroFlo is based in Norcross, GA with over 50 years of experience manufacturing packaged pumping systems and the first to prepackage pumping systems for boosting pressure in domestic water distribution systems. The "IronHeart," which has been the core of our business since 1985, has been the industry standard for pressure boosting domestic water in commercial buildings. We offer 32 standard models featuring close coupled end suction pumps configured in duplex and triplex models with flow rated to 750 GPM and boost pressures to 190 PSI.

WHY A SYNCROFLO PRE PACKAGED SYSTEM?

All SyncroFlo IronHeart systems are manufactured to the highest standards within the 155,000 square foot facility. SyncroFlo has a superior Quality Management System that is ISO 9001:2015 certified. All systems bear the UL & ETL labels and are certified to UL 778 and UL 508A standards. All our domestic water systems including the IronHeart line are NSF/ANSI 61, 372 & Annex G certified for drinking water applications. Control panels are assembled in a UL 508A panel shop with a QR (Quick Reference) code identification for web based access to the project documents. All systems are factory tested in a NIST traceable test stand and the results are recorded for generation of an XY plot.

QUALITY CONTROL AND TESTING!

SyncroFlo's quality control program is on the leading edge of technology for our industry. Each system is tracked at all stages of manufacturing, assembly, and testing with web based reporting via hand held devices. All welding is performed by AWS or ASME qualified welders. Once manufacturing and assembly are complete, the system is connected to our NIST calibrated test rig. We then hydrostatically test and flow test from zero to 100% of design and under specified suction and net delivery pressures. Once on site, your only surprise is how easy the system is to startup and commission.

VP Technical—Bill Deardurff

Hello to all ASPE Members and friends,
Our September speaker will be Daryl Jones of Oatey talking about Curbless Shower Design.

Please plan on going to the ASPE Exposition and Convention in Indianapolis in September.

In October the speaker will be Paul Galvin of GF Piping Systems talking about Polymer Process Water Piping Systems.

Please send me any ideas for speakers or topics for this year's meetings.

Bill Deardurff

ASPE Seeks Volunteers to Help Develop New Standard on Thermal Disinfection

ASPE Working Group 99 was recently approved to develop a new standard that will provide guidelines to the healthcare and MEP engineering communities on approaches to optimally implement and manage the thermal disinfection process, and we seek industry experts (mechanical/electrical/plumbing engineers, healthcare facility owners and management and operations personnel, and plumbing product manufacturers) to participate in the process. Interested professionals can apply at aspe.org.

ASPE 99-202x: Implementation and Management of the Thermal Disinfection Process in Domestic Hot Water Systems will provide guidelines to the healthcare and mechanical/electrical/plumbing engineering communities on approaches to optimally implement and manage the thermal disinfection process. This standard will provide direction on how to effectively implement and manage the thermal disinfection process utilizing these components.

ASSE/IAPMO/ANSI 12080 for Legionella Water Safety and Management Personnel Available

ASSE/IAPMO/ANSI 12080: Professional Qualifications Standard for Legionella Water Safety and Management Personnel, has been designated as an American National Standard by the American National Standards Institute (ANSI) and is now available for purchase.

ASSE/IAPMO/ANSI 12080 outlines the minimum qualifications needed, including knowledge and competency, to become a member of a water safety team involved in the development of a risk assessment analysis, and water management and sampling plan, for protection from Legionella and other waterborne pathogens. Its purpose is to provide a curriculum of minimum criteria, identified by industry consensus, to ensure knowledge and understanding of standards and codes, and the resources, understanding, and skills needed to

conduct a facility risk assessment and implement a water safety and management program to reduce the risk of infections due to Legionella.

To purchase ASSE/IAPMO/ANSI 12080, please visit the ASSE International Webstore (<http://www.assewebstore.com/>) For questions regarding the standard, contact Marianne Waickman at marianne.waickman@asse-plumbing.org or (708) 995-3015.

ASSE/IAPMO/ANSI 12080 for Legionella Water Safety and Management Personnel Available

ASSE/IAPMO/ANSI Series 5000-2022: Cross-Connection Control Professional Qualifications Standard has been designated as an American National Standard by the American National Standards Institute (ANSI) and is now available for purchase.

ASSE/IAPMO/ANSI Series 5000, the referenced standard in the Uniform, International, and National Standard Plumbing codes, provides requirements for testing of backflow prevention assemblies and establishes the minimum qualifications requirements for certified backflow prevention assembly testers, fire protection system cross-connection control testers, backflow prevention assembly repairers, cross-connection control surveyor/specialists, and backflow prevention program administrators. The Series 5000 is referenced by code bodies and authorities having jurisdiction throughout North America and on an international basis. The document also contains additional information in its appendices, including field test procedures, troubleshooting flowcharts and guides, assembly and test kit schematics, and sample field test report forms.

To purchase ASSE/IAPMO/ANSI Series 5000-2022, please visit the ASSE International Webstore at assewebstore.com. For questions regarding the 2022 edition, contact Janice McNellis, ASSE International Manager of Professional Certifications, at janice.mcnellis@asse-plumbing.org.

Additional Products Distributed: www.repsourcellc.com	Bathroom Partitions (solid plastic, baked enamel, stainless steel, laminate and phenolic), Bathroom Accessories, Lockers (solid plastic and metal), Water treatment products.

VP Membership—Tim Firlik

Welcome back from summer! I hope everyone had an enjoyable summer and either got enough baseball in or relaxed on the back patio or deck. Just around the corner is the ASPE Convention, and our own in person meetings. Please make note that these meetings are now being held at Raymond Memorial Golf Course and will feature many great speakers!

The Central Ohio Chapter of ASPE is looking for new members! Do YOU know of any?? Anyone that would benefit in Plumbing Technical Publications – Plumbing Convention and Technical Symposia - Certifications in Plumbing Design – Plumbing Codes and Legislation – Continued Education Programs and networking with peers throughout the plumbing industry. Please send them my email address and we'll get them signed up with this great organization. tfirlik@cmta.com

Membership renewal! If you are up to renew your membership remember to do it today! We don't want to see you go!! See you in September at our next ASPE meeting, join us in person and connect again with Reps and fellow members. There is a new option to be apart of multiple chapters! If you are interested please keep The Central Ohio Chapter as your home chapter and signup for as many others as you wish for only \$80 per chapter.

BENEFITS OF MEMBERSHIP

Becoming a member of the Central Ohio ASPE Chapter provides the following benefits:

- ASPE Plumbing Engineering Design Handbook
- Bi-monthly subscription to Plumbing Systems & Design magazine
- ASPEReport (in Plumbing Engineer magazine)
- Members Only ASPEnet Access (includes access to ASPE Data Books chapters)
- Publications and Education Programs Discounts
- ASPE Biennial Convention and Exposition (even years)

- ASPE Biennial Technical Symposia (odd years)
- Technical Seminars and Workshops
- Access to Earn Continuing Education Units (CEUs)
- Technical Books and Manuals (specific to the profession of plumbing engineering)
- Professional Certification / Recertification
- Continuing Education Opportunities in Plumbing Engineer magazine
- Alfred Steele Scholarship Program
- Local Chapter Affiliation
- Monthly Chapter Meetings and Technical Seminar Opportunities
- Networking Opportunities with Plumbing Engineers Worldwide

Leadership Opportunities (Board of Directors, Region Chairs, Chapter Officers, Committees) Please remember if any of your pertinent information has changed that it is your responsibility to notify ASPE National and The Central Ohio Chapter. You'll want to do this in order to remain on our mailing list.

IAPMO Publishes the Water Demand Calculator as a Standalone Document

The International Association of Plumbing and Mechanical Officials (IAPMO®) has published IAPMO/UPC/Appendix M-2021, Peak Water Demand Calculator, as a standalone document. This document is a direct extract from Appendix M of the 2021 Uniform Plumbing Code (UPC®), which was developed via an ANSI-accredited development process. All references to other sections of the UPC have also been extracted to avoid dependence of additional documents. The IAPMO/UPC/Appendix M-2021 is a document that can be readily utilized and adopted by any jurisdiction for water and energy conservation, to improve housing affordability, and to improve water quality.

A copy of IAPMO/UPC/Appendix M-2021 can be purchased here: iapm-membership.org/store/2021-upc-appendix-m-ebook/1175.

U.S. Department of Energy Releases Energy-Savings requirements for Federal Buildings

The U.S. Department of Energy (DOE) has announced the release of new energy-efficiency requirements for federal buildings (<https://www.federalregister.gov/documents/2022/04/05/2022-07138/energy-efficiency-standards-for-the-design-and-construction-of-new-federal-low-rise-residential>) that will take effect in 2023. Along with these requirements, the DOE also proposed new standards for residential room air conditioners and pool heaters to help consumers save on utility bills. The new codes and standards are estimated to potentially save more than \$15 billion in net costs over the next 30 years and allow the federal government to lead by example in energy efficiency.

In April of 2023, all new federal buildings and major retrofits to existing federal buildings must comply with the International Code Council's 2021 International Energy Conservation Code (IECC) and the 2019 ASHRAE Standard 90.1. According to the DOE, implementation of the IECC and ASHRAE Standard 90.1 will save \$4.2 million dollars in operating costs within the first year.

New ASTM Water Standard to Help Detect Legionnaire's Disease Bacteria

ASTM International's water committee (D19) has approved a new standard that provides an easy and accurate culture method for detecting *Legionella pneumophila*, the primary bacteria responsible for Legionnaires' disease. It is a potentially lethal pneumonia contracted from the inhalation of *L. pneumophila* bacteria that has been aerosolized by contaminated water sources such as showers, pools and spas, or cooling towers.

The new standard (D8429) describes a method for detecting and quantifying *L. pneumophila* to meet water management requirements. Such requirements are necessary to regularly validate that treatment and control measures are effective in potable and nonpotable water associated with industrial, commercial, healthcare, and residential settings. Jody says the new method is easier to perform and provides faster results than other methods.
