

ASPE TechSymposium 2021

Jim Cika

Jim Cika is Director, PMG Technical Resources for the International Code Council, where he serves as a subject-matter expert to the plumbing, mechanical, and fuel gas codes. He represents ICC in federal and state coalitions, task forces, committees, and councils where expertise in I-Code subjects is required. Jim has more than 20 years of experience in the manufacturing and construction industry, where he has served as a chief technical expert for regulatory, product standards, building code, and product engineering matters.

2021 International Plumbing Code Significant Changes

This session will present the significant changes from the 2018 International Plumbing Code (IPC) to the 2021 IPC. The information presented will allow for the application of these new code requirements to design, plan review, and/or inspection. This session is designed for building department staff, architects, engineers, designers, contractors, homeowners, and all other interested individuals.
